Anbauempfehlungen

MAS 251T is a versatile hybrid that will thrive in very diverse environments. Its short stature and great yield potential makes it a relevant choice for many corn growing areas. MAS 251T is a WATERLOCK hybrid that can withstand drought periods.

	Optimale Bedingungen	Ungünstige Bedingungen
Eignung	4 An 4	3 An 4
Aussaatstärke - Körner	95000 Körner/ha	75000 Körner/ha

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
